## Profile summary

---

As a passionate and dedicated junior developer, I have foundational knowledge and hands-on experience in creating websites using HTML, CSS, and JavaScript. My skill set includes:

- **HTML:** Proficient in structuring web content using semantic HTML5 elements.
- **CSS:** Skilled in designing responsive and visually appealing web pages using CSS3, including Flexbox and Grid layout techniques.
- **JavaScript:** Capable of adding interactivity to web pages through vanilla JavaScript, with a focus on DOM manipulation and basic event handling.

I am always eager to learn and expand my skill set, driven by a strong interest in web development and a commitment to creating user-friendly and accessible websites. I am actively seeking opportunities to work on challenging projects that will allow me to grow and develop my expertise further.

## Technical Skills

---

. React.js	. HTML	. CSS
. Bootstrap	. Express.js	. MongoDB
. Node.js	. SQL	. JavaScript

## Experience

---

1. Worked as team leader with a team of six in college project for the company ActionAid where we had to create a website so that all their staff can read the company data through same portal, and they would be able to keep track and records of their work
