Summary

Hi I am Shailesh Gharti, Full-stack Developer. With foundation in full-stack development, rest framework, and performance scalability. I prioritise clean, maintainable code and stay adaptable to emerging technologies.

Experience

Full-stack-Developer at [Action-Aid](#)

Action-Aid organisation Australia, Sydney- june 2023 - October 2023

- Built an offline-first mobile app for Action Aid, enabling field staff to store data locally and sync with the central database upon network availability, resolving key storage issues and streamlining field operations.
- Led the team and maintained clear client communication to gather and translate user requirements into technical tasks, ensuring the app aligned with expectation and delivered customer satisfaction.
- Gained local experience by leading the team in the real world.

Full-Stack developer at Theme Nepal

Kathmandu, Nepal | Nov 2024 - April 2025

- Delivered high-quality software solutions for diverse clients, including a startup and a local business, using technical expertise in JavaScript.
- Built and integrated RESTful APIs, handled database design, and implemented responsive front-end interfaces to ensure smooth user experiences.
- Gained hands-on experience with Agile workflows and Git-based version control.

Projects

[Finance Tracker](#).(ReactJS, NodeJS, MongoDB, ChartJS)

- Developed a finance tracker with JWT authentication, real-time transaction management, Chart.js for graphical views, and AI-based financial suggestions using OpenAI API.

[Library management system](#)(JWT, ReactJS, NodeJS, MongoDB.)

- Built a library management system with user authentication via JWT, role-based access for admins and students, and file uploads using Multer with Cloudinary for image storage.

Education

Bachelor in Information Technology

Victorian Institute of Technology

Software development bootcamp

Dented Code

- Built the foundation of full-stack development through hands-on projects using (MongoDB, Express, React, Node.js).
- Gained proficiency in version control with Git and GitHub, managing codebases and team collaboration effectively.
- Led team as a scrum master and project manager, delivering real-world projects under tight deadlines.
